

# The Military Is Planning To Alter Humans Through Artificial Intelligence And The 'Hive Mind'

Dr. Robert Duncan, an insider at DARPA (Defense Advanced Research Projects Agency) reveals what the military is doing in the name of 'cybernetics', which is the science of controlling humans as machines. Topics covered will astound you – mind control, transhumanism, and the development of a new species – but everything discussed is real and actually under development. Duncan defends scientists who work on these things because they believe the results can be beneficial, but he admits that this is not likely because the military is paying their salaries and controlling the research. Duncan's final comment is that there may be an agenda to depopulate the world. –GEG

# Investigative Reporter Says The Zika Vaccine Will Alter Your DNA

Although public-health officials say that microcephaly birth defects are caused by the Zika virus, there is no proof of that. In fact, there is much evidence that the defects are linked to pesticides in water supplies. Nevertheless, the treatment being offered to prevent this disorder is a vaccine that changes the DNA of humans. The process differs from most vaccines because it is designed, not to create immunity directly, but to do it indirectly by altering genes. Artificial versions of genes that produce antibodies are synthesized, injected, and then incorporated into the recipient's DNA. If a person's DNA is changed, it is expected that the altered DNA will be passed down to its offspring – and its offspring – forever. Aside from the fact that the Zika virus may not even be the problem, what could possibly go wrong? –GEG

Zika vaccine: watch out—it will alter your DNA

First, I'll lay out a little background—

In many previous articles, I've established there is no convincing evidence the Zika virus causes the birth defect called microcephaly. (Zika archive [here](#))

Basically, Brazilian researchers, in the heart of the purported “microcephaly epidemic,” decided to stop their own investigation and simply assert Zika was the culprit. At that point, they claimed that, out of 854 cases of microcephaly, only 97 showed “some relationship” to Zika.

You need to understand that these figures actually show evidence AGAINST Zika. When researchers are trying to find the

cause of a condition, they should be able to establish, as a first step, that the cause is present in all cases (or certainly an overwhelming percentage).

This never happened. The correlation between the presence of Zika and microcephaly was very, very weak.

As a second vital step, researchers should be able to show that the causative virus is, in every case, present in *large amounts* in the body. Otherwise, there is not enough of it to create harm. MERE PRESENCE OF THE VIRUS IS NOT ENOUGH. With Zika, proof it was present in microcephaly-babies in large amounts has never been shown.

But researchers pressed on. A touted study in the New England Journal of Medicine claimed Zika infected brain cells in the lab. IRRELEVANT. Cells in labs are not human beings. The study also stated that Zika infected baby mice. IRRELEVANT. Mice are not humans. And these mice in the lab had been specially altered or bred to be “vulnerable to Zika.” USELESS AND IRRELEVANT.

All this fraud set the stage for the Zika DNA vaccine. Yes, it is under development. It is, in fact, an example of the next generation of vaccines. And this is why you should watch out.

Here is an excerpt from a US National Institutes of Health press release (8/3/16) ([here](#), [here](#), and, the booster to the DNA vaccine [here](#)):

“The National Institute of Allergy and Infectious Diseases (NIAID), part of the National Institutes of Health [NIH], has launched a clinical trial of a vaccine candidate intended to prevent Zika virus infection.”

“Scientists at NIAID’s Vaccine Research Center (VRC) developed the investigational vaccine – called the NIAID Zika virus investigational DNA vaccine – earlier this year.”

“The investigational Zika vaccine includes a small, circular piece of DNA – called a plasmid – that scientists engineered to contain genes that code for proteins of the Zika virus. When the vaccine is injected into the arm muscle, cells [in the person’s body] read the genes and make Zika virus proteins, which self-assemble into virus-like particles. The body mounts an immune response to these particles, including neutralizing antibodies and T cells. DNA vaccines do not contain infectious material – so they cannot cause a vaccinated individual to become infected with Zika – and have been shown to be safe in previous clinical trials for other diseases.”

SYNTHESIZED GENES ARE INJECTED INTO THE BODY.

That’s why it’s called a DNA vaccine.

Beginning to wonder what this is all about?

It’s about PERMANENTLY ALTERING YOUR DNA.

It’s about altering the DNA of every person on the planet who is vaccinated.

New York Times, 3/9/15, [“Protection Without a Vaccine.”](#) The article describes the frontier of research. Here are key quotes that illustrate the use of synthetic genes to “protect against disease,” while changing the genetic makeup of humans. This is not science fiction:

“By delivering synthetic genes into the muscles of the [experimental] monkeys, the scientists are essentially re-engineering the animals to resist disease.”

“‘The sky’s the limit,’ said Michael Farzan, an immunologist at Scripps and lead author of the new study.”

“The first human trial based on this strategy – called immunoprophylaxis by gene transfer, or I.G.T. – is underway, and several new ones are planned.” [That was nearly two years

ago.]

“I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into viruses and injected into human tissue, usually muscle.”

Here is the punchline: “The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient’s own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies.”

Read that again: “the synthetic gene is incorporated into the recipient’s own DNA.”

Alteration of the human genetic makeup.

**Your Utility Company Is  
Spying On You And Selling**

# Information On Your Activities To Corporations, Governments, And ... Who Else?

Jerry Day analyzes a sales video for a software program that enables utility companies to collect data on the minute-by-minute activities of their customers. It creates personal profiles on energy users to be sold to anyone willing to pay for it, which means anyone who can benefit from it. None of this is for the benefit of those being spied upon. The device that makes this possible is the Smart Meter. -GEG
