

The Pope Gives President Trump A Document Promoting the Theory of Man-Made Global Warming Written by Depopulation Advocates and Pagan Worshipers

When President Trump visited the Vatican this week, the Pope gave him his encyclical on climate change. An encyclical is a document bearing the signature of the Pope that expresses his personal opinion or that of contributing authors. It is without religious authority and is not binding upon the church or its followers. The encyclical on climate change was written by globalists who are collectivists, depopulation advocates, and whose reverence for Gaia (Mother Earth) is on a par with any pagan religion. -GEG
