

# Virginia Removed 5,556 Illegal Alien Voters Who Were Only Exposed by Accident

written by GEG | June 1, 2017

The Public Interest Legal Foundation released a study, Alien Invasion, which found that 5,556 voters were quietly removed from vote rolls due to non-citizenship. The illegal voters had cast more than 7,000 votes by the time their voting rights were terminated. The illegal voters were caught by accident, indicating that many more illegal aliens are voting in elections across the state. Virginia Governor Terry McAuliffe vetoed several bills that would have stopped this type of vote fraud. California's system is profoundly corrupt, and perhaps beyond repair, as illegal aliens may obtain drivers licenses without specifying citizenship (a new law will go into effect this year in which the DMV will automatically register people to vote). -GEG
