

# Here Is A Petition that Gives Trump Legal Standing and Public Support to Stop Childhood Vaccines

written by GEG | August 2, 2017

Attorney Ralph Fucetola explains that most federal regulations start as citizens' petitions through the Administrative Practices Act and he has filed such a petition with [regulations.gov](https://www.regulations.gov) that will give President Trump the legal standing to act on this issue. It also will show popular support to encourage him to do so in the face of the vaccine lobby. The petition asks for a five-year childhood-vaccine moratorium and calls for safety studies that have never been done. [Here is the link](#) for the petition and your comments. –GEG
