

Racist, New Smear Word Against Anyone Who Opposes Leftist Agendas

There is a propaganda war being waged in the media and Youtube. The word racism is serving the same purpose today that the word McCarthyism did in the 1960s. It has no bearing on reality but, repeated loud enough and often enough and backed by the 'authority' of the mass media, it is intended to discredit and silence anyone who opposed Leftist agendas. Here are examples of the extreme bias in this process. -GEG

CDC-Funded Study Shows Flu Shots Linked to Spontaneous

Abortions

A study funded by the US Center for Disease Control will be published in the medical journal, *Vaccine*, that there is a 400% increase in spontaneous abortions / miscarriages among pregnant women who received flu vaccines two years in a row. Flu shots contain mercury, a potent neurotoxin, at a level of over 50,000 ppb. That is twice the limit approved by the EPA for drinking water. -GEG

A CDC-funded medical study being published by the [medical journal Vaccine](#) has confirmed a shocking link between flu shots and spontaneous abortions in pregnant women. The study was rejected by two previous medical journals before *Vaccine* agreed to publish it, further underscoring the tendency for medical journals to censor any science that doesn't agree with their pro-vaccine narratives.

"A study published today in *Vaccine* suggests a strong association between receiving repeated doses of the seasonal influenza vaccine and miscarriage," [writes CIDRAP](#), the Center for Infectious Disease Research and Policy.

"A puzzling study of U.S. pregnancies found that women who had miscarriages between 2010 and 2012 were more likely to have had back-to-back annual flu shots that included protection against swine flu," [reports Medical Xpress](#), a pro-vaccine news site that promotes vaccine industry interests. Notice that the opening paragraph of their study assumed the study couldn't possibly be true. It's "puzzling" that mercury in flu shots could cause spontaneous abortions, you see, because these people have no understanding of biochemistry and the laws of cause and effect.

"That study was conducted after the CDC made the recommendation 2004 that all pregnant woman in all trimesters get the seasonal flu shot," explains CIDRAP. That's because the CDC is primarily a [vaccine propaganda front group](#) that

buries whatever science it doesn't like while promoting the interests of vaccine manufacturers.

400% increase in miscarriages among pregnant women who receive vaccines

The study found a more than 400% increase in spontaneous abortions / miscarriages among pregnant women who received flu shots vaccines in back-to-back years. As [ABC News reports](#):

The study's authors, two of whom are CDC researchers, saw a big difference when they looked at women who had miscarried within 28 days of getting a shot that included protection against swine flu, but it was only when the women also had had a flu shot the previous season. They found 17 of 485 miscarriages they studied involved women whose vaccinations followed that pattern. Just four of a comparable 485 healthy pregnancies involved women who were vaccinated that way.

This new research confirms the truth about vaccines that [Natural News](#) has been courageously reporting for years: Flu shots cause spontaneous abortions and numerous other health problems. See the evidence yourself in this article entitled [Why flu shots are the greatest medical fraud in history.](#)

It has already been well established that women who receive flu shots in previous years have weakened antibody response to flu shots in the current year. This was documented in a study published in *Vaccine* entitled, [Effects of prior influenza virus vaccination on maternal antibody responses: Implications for achieving protection in the newborns](#). That study abstract admitted, "Prior receipt of influenza vaccine can dampen antibody responses to subsequent vaccination." In other words, flu shots weaken your immune response to future flu shots.

We also know that flu shots contain mercury, a potent neurotoxin. Mercury is unsafe to inject into a human being at

any level, yet my own laboratory research using mass-spec instrumentation confirmed that [flu vaccines contain over 50,000 ppb mercury](#) – more than 25,000 the EPA's legal limit of mercury in drinking water.

China Orders Bitcoin Exchanges to Shut Down. Price drops 15%

Chinese authorities have ordered Bitcoin exchanges to close. Uncertainty about the digital currency's future in China caused its price to fall 15% to about \$3,300. The currency has shed about a third of its value since Sept. 1, but is up from \$600 a year ago.

BEIJING – One of China's biggest bitcoin exchanges says it will end trading after news reports regulators have ordered all Chinese exchanges to close caused the price of the digital currency to plunge.

[BTC China](#) said on its website it will “stop all trading business” on Sept. 30. The exchange said it was acting “in the spirit of” a central bank ban last week on initial coin offerings but gave no indication it received a direct order to close.

The central bank has not responded to questions about the currency's future in China.

There was no immediate word from other Chinese bitcoin exchanges about their plans.

Bitcoin's value tumbled 15% on Thursday to about \$3,300. The famously volatile currency has shed about a third of its value since Sept. 1 but is up from about \$600 a year ago.

Bitcoin surged in popularity in China last year as its price rose. Trading dwindled after regulators tightened controls and warned the currency might be linked to fraud.

Two business newspapers reported Thursday regulators in Shanghai, the country's financial center, gave verbal instructions to Chinese bitcoin exchanges to close.

Bitcoin is created and exchanged without the involvement of banks or governments.

US Congress Overwhelmingly Approved a Resolution Against White Nationalism

US: Congress overwhelmingly approved a resolution condemning

white nationalists, neo-Nazis, and other hate groups. It did not condemn Antifa, currently the biggest and most violent hate group in America. -GEG

Virginia Democratic Sen. Tim Kaine says he does not know much about members of so-called “anti-fascist” groups but says it is unfair to paint them with a broad brush.

When asked by The Daily Caller Thursday if “antifa” should be considered a terrorist organization, Kaine replied: “I don’t like broad brushes and I don’t know enough about them to say that they’re terrorists but people who do violent things. The law should take care of them.”

The Department of Homeland Security has called the activities of Antifa “domestic terrorist violence,” according to Politico.

Kaine’s son, Linwood, [was arrested](#) back in March at a pro-Trump rally at Minnesota’s state capitol on [misdemeanor](#) charges in connection with lighting smoke bombs.

The younger Kaine was accused of taking part in antifa activities against Trump supporters.

When asked about his son’s arrest at the time of his son’s arrest the Senator said through a spokeswoman to CNN: “We love that our three children have their own views and concerns about current political issues. They fully understand the responsibility to express those concerns peacefully.”

Sen. Kaine, along with Democratic Sen. Mark Warner and Republican Sens. Cory Gardner and Johnny Isakson, signed a bipartisan resolution Wednesday condemning “white nationalists, white supremacists, the Ku Klux Klan, neo-Nazis and other hate groups” for their role in the violence in Charlottesville, Va., last month, but does not mention so called anti-fascist groups. 20,000 Swedes Have Been Implanted with Microchips – Voluntarily

Twenty thousand Swedes voluntarily accepted microchip implants in their hands. These will be used for identification, tracking, and banking transactions. Three thousand commuters now use chips to buy their train tickets.

Would you get your travel card implanted into your HAND? 3,000 Swedish commuters are now using microchips to pay for their journey

- In a new BBC interview it was revealed that 3,000 customers use the service
- The firm does not microchip people itself, and they must have it done elsewhere
- But several companies in Sweden already offer the service to their employees

When you're in a rush, it can be easy to forget your travel card on the way out of the house.

But for around 3,000 commuters in Sweden, this isn't something

to worry about.

The brave commuters have futuristic microchip implants embedded into their hands to pay for their journey.

But the technology raises security and privacy issues, as the data generated could be used to track people.

I

n June, SJ Rail, the Swedish train operator, announced that around 100 people were using microchips to pay for their journey.

But in a new interview with the [BBC](#), it was revealed that an estimated 3,000 people now use the service.

In a video, the Travel Show's Ade Adepitan said: 'So far around 3,000 people in Sweden have a microchip.'

Commuters with a microchip in their hand are able to have their ticket loaded directly onto the device.

The train conductor can then read the chip with a smartphone to confirm the passenger has paid for their journey.

Stephen Ray, who is overseeing the SJ Rail project, told the BBC: 'You could use the microchip implant to replace a lot of stuff, your credit cards, they keys to your house, the keys to your car.'

SJ Rail is not offering to microchip people itself, and passengers wanting to use the service must already have the futuristic technology.

Mircrochip implants are not new in Sweden, and an estimated 20,000 people already have them, using the devices to swipe in and out of the office, and even pay for food.
