written by GEG | March 5, 2018

Australia: A play titled 'Kill Climate Deniers' has opened in Sydney despite concerns that fanatics may copy the plot, which favorably portrays ecoterrorists who surround Parliament, take them hostage, and threaten to execute them unless they end global warming tonight. The producers say the play is light-hearted and lots of fun, but the theme is meant to be a serious political statement against those (like us) who reject junk science behind the myth of global warming. The play was commissioned by the government for \$19,000.

The image displays the logos of nine Voluntary Agencies (VOLAGs) that resettle refugees. The logos are arranged in a grid-like fashion. In the US, there are nine Volags (voluntary agencies) funded by more than \$1 billion each year by the State Department to resettle refugees in the US. Under the Trump administration, the flow of immigrants has been reduced to a trickle – an average of 1,727 people per month, which is the lowest number in 15 years. As expected, the Volags are not pleased.

written by GEG | March 5, 2018

The students at Parkland high school reportedly organized gun-control activism on a national level with a march, a mass school walk-out, and raising one-million dollars from George Clooney and Oprah. In truth, Congresswoman Debbie Wasserman Schulz lobbied the Florida State Legislature, the teacher's union is providing buses, and Michael Bloomberg is organizing the upcoming March For Our Lives, MoveOn.org is promoting the project on social media, and training for student activists is provided by Planned Parenthood. Except for David Hogg, the kids have no idea of what is going on.
