School-Safety Administrator Discusses Disturbing Evidence in Parkland School Shooting

Wolfgang Halbig, a retired Florida State school administrator and safety expert who researched the Sandy Hook school shooting in 2012 and concluded it was a "contrived event", now turns his investigative skills to the shooting at Parkland high school. Halbig wrote the school safety plan for the Douglas high school in 2006, and says that the Parkland shooting follows the same script as the Sandy Hook event: There were no trauma helicopters called in, paramedics were not allowed into the school, and it is unknown who declared the victims dead.

Halbig discusses in great detail numerous examples of how school administrators and police violated well known safety protocols, the effect of which was to put children and teachers into high risk of being killed — all in violation of established safety protocols.

This interview includes a TV clip of a teacher saying that she clearly saw the shooter in the corridor outside her classroom. He was dressed in full body armor with helmet and mask, exactly like a swat-team member. She thought it was a police officer. it was not Nicholas Cruz, the student that police say has confessed to the shooing. The school has refused to release surveilance video of the corridor. -GEG

Dark-Web Browser Partners with US Intelligence Agencies

Tor is a browser that claims to allow users complete anonymity and is used to navigate the dark web. The Tor Project, hailed as a bulwark against the encroaching surveillance state, has received funding from a US government agency called the BBG and, according to newly released documents, is cooperating with intelligence agencies. Tor has been endorsed by Julian Assange and Edward Snowden who claimed that the US government would not be able to subvert it. -GEG

Anti-Gun Lobby Pushing

'National Walkout Day for School Safety'

Anti-Second Amendment groups are organizing a National Walkout Day for School Safety on March 14th, and they are encouraging children as young as 9-years-old to participate. The walkout will involve leaving the classrooms for 17 minutes. This could not happen without the full support of the school administrators. -GEG

Radical leftist groups are organizing [massive anti-gun walkout protests](#) on March 14th.

The protests are part of a nationwide effort by anti-Trump groups to strip Americans of their right to bear arms.

One New Jersey father with 9-year-old children received this letter from the school this week.

They are marching the children outside of school to hold a demonstration against legal gun owners.

*Dear Jim – Got this from a friend of mine with two children in a ******, NJ school district… They are planning for a walkout on March 14th. His children are 9 years old.*

Nothing like the Hitlerian way the left uses children as tools.

Thought you might like to highlight something like this on your site.

Thanks as always and keep up the GREAT WORK! Your page is my number one go-to page many times a day!

Racism Against Whites Flourishes in South Africa

Julius Malema, the leader of the Marxist-Revolutionary Economic Freedom Fighters party led the charge to change the country's constitution so land owned by whites may be expropriated without compensation. The ruling majority party, the Marxist ANC, also called for the taking of farmland from whites. Most blacks have accepted Marxism and want revenge on whites, who they have been told are the last vestiges of evil capitalism. Whites comprise about 8% of the total population of an estimated 60 million people. Malema told his followers to "go after a white man" in the name of "cutting the throat of whiteness." -GEG

Just as the legacy of Jim Crow, the evil inflicted upon South African blacks during apartheid was an atrocity. That does not mean, however, that evil should be inflicted upon innocent whites far removed from those horrific times.

The reconciliation that former South African President Nelson Mandela hoped to achieve in the 1990s has been all-but-jettisoned. As of last week, the South African parliament voted to seize all land from white farmers without compensation, a motion largely prompted by the hateful Julius Malema, leader of the Marxist-Revolutionary Economic Freedom Party.

Since parliament passed the initiative, Malema, who has a [rap-sheet of racist rhetoric](), has been turning the anti-white hate speech up to dangerous levels. Just recently, he told crowds of followers to "go after a white man" in the name of "cutting the throat of whiteness."
