

Hordes of Teen Thugs Terrorize Las Vegas Neighborhood

Las Vegas: A gang of 60 youngsters, reported to be about 12 years old, are beating up their neighbors, stopping traffic, attacking cars, throwing rocks and destroying property. The police are catching them, cuffing them, and setting them free, while officials at the children's middle school refuse to get involved. Neighbors say they have spoken to the parents to no avail. Someone is going to get hurt.

Remember the "knockout game" from a few years ago? Apparently a new version of it is back. Despite multiple victims filing police reports, and some even presenting cell phone video as evidence, Las Vegas police are apparently refusing to do anything about a group of violent teenagers who have been jumping people in a neighborhood, beating them, throwing large rocks at them, and attacking people inside their cars.

One neighbor says "It's like this every day. Two or three times a day there's problems. Police have been up here two or three times every day. They get groups of these kids on their cars, put them in handcuffs, and two minutes later they're letting them walk again. We know names, we have pictures, we've spoke with parents."

[FOX 5 KVVU reports:](#)

On April 27, the group of teens were recorded on cell phone video attacking a woman. Neighbors said **the woman was attacked three times and suffered a sprained ankle and broken finger.**

“Sixty kids came out of no where and just rushed everyone,” Jon Harris said of his wife’s attack. “I don’t know how it started but we turned around and my wife was getting jumped by a bunch of kids.”

In the same video that captured the attack, the group of teens were seen picking up baseball size rocks and throwing them. Many of those rocks, neighbors said hit homes and cars.

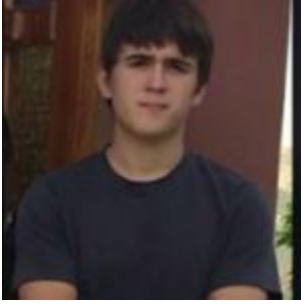

“They hit my neighbors’ wife with those rocks,” Harris said. “He was also hit trying to protect his wife.”

“I want people to know that video where my neighbor is getting beat, this isn’t a one time thing,” Eric Phillips said. Phillips is a middle school math teacher, and lives in the neighborhood.

Others there said the teens have been causing problems in the area for months.

“You can’t drive down the street. They stop cars they try to get in the cars. They start banging on cars,” Harris said. “We know there names, we have pictures we have videos we have spoke to their parents. I mean two to three times a day they are an issue and 2-3 times a day police come. Police handcuff them, then 10 minutes later you see them back walking around.”

Texas School Shooting: Unanswered Questions and Oddities

A shooting last Friday at the Santa Fe High School in Texas left ten people dead, stirring up calls for gun control. There are some troubling aspects of this case: a doctor said that they are always “prepared for these drills”, the media is silent about the second suspect, and a student witness said, “It was real this time, it wasn’t real last time,” implying there was a prior incident.

The official narrative of the May 18 shooting at the Santa Fe High School in Texas says that Dimitrios Pagourtzis, 17, entered a classroom armed with his father’s legally owned shotgun and .38 revolver. He was reportedly wearing a “Born to Kill” T-shirt, and yelled “Surprise!” before opening fire at his classmates, killing 10 people and wounding 10 other survivors. Students described Pagourtzis as quiet and “weird” because a long trench coat was part of his wardrobe, even on days when the temperature neared 90 degrees. He was arrested at the scene.

Galveston County Magistrate Mark Henry said that police had found a pressure cooker with an alarm clock and nails, but no explosive material. An unlit Molotov cocktail was also found. Another law enforcement source said that they were

searching a trailer where they believe the devices were assembled.

Unanswered Questions and Oddities

The mainstream media is ignoring certain aspects of this case that are suspicious...

1. [CNN](#) reported that Harris County Sheriff Ed Gonzalez said that a second person, believed to be a student, has been detained, but there are no more details. Will the media memory hole this part of the story?

2. This strange interview features a student witness saying, **"It was real this time, it wasn't real last time."** The reporter failed to follow up on that bizarre statement that implies there was a prior event.

https://www.youtube.com/watch?v=cl_ZWzbSH50

3. Two doctors were interviewed by a news source and the reporter said that she was aware that the hospital had just done a mass casualty drill to prepare for something like this, and the second doctor said that they are "always prepared for these drills."

4. Why are there no video uploads from high school students who had cell phones?

5. Are there cameras at the school that recorded video?

6. Why is the media silent on whether the alleged shooter, Dimitrios Pagourtzis, is using psych drugs like SSRIs, even though psych drugs have been associated with almost all school shootings?

7. Did the media coordinate its immediate uniform narrative and condemnation of the NRA?

8. Pagourtzis is being labeled a right-wing white supremacist when there was an iron cross pinned on his trench coat along

with a leftist communist sickle and hammer pin.

.
9. The media silent on investigators who also swarmed a second home in a neighborhood about five miles away from the school. Officials there could be seen gearing up with battering rams, sledgehammers and saws. There has been no more word on this part of the investigation.

.
10. In a separate "incident," a US military helicopter dropped a box of ammo thru the rooftop of **Parkland** Elementary school in El Paso, TX:

CA Republican Representative

Fails to Explain Why He Prioritizes Dreamers over Homeless Citizens

Tucker Carlson grills US Representative Jeff Dunham, a Republican from California, about why he is pushing a measure to force immigration votes in the House that would give amnesty to DACA Dreamers that goes against the wishes of voters. Tucker asks why Dunham is making amnesty a priority when there are 100,000 homeless US citizens living on the sidewalks of California.

The Secret Empire of Mitch McConnell and His Wife, the Head of the Transportation Department

Senator Mitch McConnell's wife, Elaine Chao, is the Secretary of the Department of Transportation, and another plum government job may be handed to their family as her sister's husband, Gordon Hartogensis, has been nominated to be the new director of the Pension Benefit Guaranty Corporation. Peter

Schweizer, author *Secret Empires*, revealed that Elaine Chao's family owns a major shipping company in China that is reliant on the Chinese government contracts. Chao has international authority over US transportation, such as the flow into ports, that can affect trade.

[Audio Interview with Author Peter Schweizer](#)

Breitbart News Senior Editor-at-Large Peter Schweizer, author of [Secret Empires: How the American Political Class Hides Corruption and Enriches Family and Friends](#), joined SiriusXM hosts Rebecca Mansour and Joel Pollak on Wednesday's *Breitbart News Tonight* to discuss the nomination of Gordon Hartogensis, brother-in-law to Senate Majority Leader Mitch McConnell, to lead the Pension Benefit Guaranty Corporation.

"The McConnell-Chao family, they have a large extended family. In fact, Elaine Chao has five sisters. Those sisters are, like Elaine, very smart and very well-educated. Grace Chao, her younger sister, her husband has been nominated to serve as the head of the pension guarantees fund corporation that the federal government runs," Schweizer explained.

"This is basically a government entity that is supposed to serve as a quasi-insurance for a corporate pension," he continued. "If you have a corporation that has a pension fund set up for employees, and they have a bad couple of years, and they have to declare bankruptcy, the pension is protected by the federal government. That's the theory behind it."

"Grace Chao's husband has been nominated for this position," he said. "The nomination came out. There was very little on his background. It was not made clear the fact that he is related to Mitch McConnell and Elaine Chao."

"What's also interesting is there's very little background on him. They simply list him as an entrepreneur. The problem is

that he really doesn't seem to have any background whatsoever in the pension business, in the finance business. He's done a little bit of work in the tech space, and he has managed some family trusts. That's all that is known about him," said Schweizer.

"It raises all kinds of questions about nepotism, about qualifications," he said. "We, of course, have [discussed](#) the financial entanglements of the Chao family on this program before and in my book. I think it adds a further layer of intrigue to precisely what this family is up to in Washington, DC."

Major Governments Are Engaged in Cyber Warfare That Has Potential to Kill Millions Without Firing A Shot

HBO documentary reveals that major nations, including the US, Israel, Russia, and China are seeking global dominance in cyber warfare. The program looks closely at the amazing prowess in this field achieved by Israel, but we are mindful that similar programs exist in all major nations.

Infrastructure, such as control systems for power plants, water-purification systems, and even control over private automobiles in motion now are easily hacked by highly-advanced cyber technologies in the hands of major governments and just waiting for the signal to 'push the button'. [You cannot afford to be unformed on this topic.] -GEG
