

Major Governments Are Engaged in Cyber Warfare That Has Potential to Kill Millions Without Firing A Shot

HBO documentary reveals that major nations, including the US, Israel, Russia, and China are seeking global dominance in cyber warfare. The program looks closely at the amazing prowess in this field achieved by Israel, but we are mindful that similar programs exist in all major nations. Infrastructure, such as control systems for power plants, water-purification systems, and even control over private automobiles in motion now are easily hacked by highly-advanced cyber technologies in the hands of major governments and just waiting for the signal to 'push the button'. [You cannot afford to be unformed on this topic.] -GEG
