

# Why Did Trey Gowdy Stop the Movement to Impeach Rod Rosenstein?

written by GEG | July 17, 2018

Trey Gowdy, Chair of the US House Oversight and Government Reform Committee, is considered as a 'conservative' in the Republican Party. However, he has come under scrutiny for his puzzling record of (1) leading his committee in gathering evidence of grave wrong-doing by key FBI figures, such as Rod Rosenstein and Robert Mueller, but (2) doing everything possible to prevent them from being impeached or prosecuted. Radio show host and attorney, Mark Levin, who worked in the administration of President Reagan and was Chief of Staff for Attorney General Edwin Meese, says that Gowdy ignored many sound reasons for Rosenstein's impeachment – and sees his performance in this matter as a repeat of Gowdy's "go-nowhere" treatment of the Benghazi investigation, which he also chaired. [The unspoken question has arisen about Gowdy being a 'mole' among conservatives acting to appear to be a champion of reform but actually working to prevent it.] -GEG
