

EPA Retreats on Trump Campaign Promise. Costly Ozone Regulations Will Continue.

written by GEG | August 10, 2018

The EPA has discontinued efforts to repeal the job-killing ozone smog regulations imposed by the Obama administration. This is a retreat from the campaign promises of President Trump who had singled out the ozone standards as one of four EPA regulations that definitely would be eliminated.

Antifa Member and Ethics Professor Escapes Punishment after Bashing Trump Supporters with A Bike Lock

written by GEG | August 10, 2018

Eric Clanton, a philosophy and ethics professor at Diablo Valley College, was granted a plea deal and will receive probation instead of punishment following his violent attacks on Trump supporters. Police report that he bashed seven people with a bike lock at Berkeley in April 2017. Clanton was charged with four counts of felony assault and faced 11 years in prison.

US College Rejects Student Applicant for Following Alex Jones on Twitter

written by GEG | August 10, 2018

Attorney Braley Shear says universities are attempting to reshape society by discriminating against students based on political ideologies and by marginalizing conservative viewpoints. He warned teens to audit their digital profiles and lock down their social-media accounts during the college-application process.

Israeli and Saudi Forces Strike Civilian Targets as War Heats Up in the Middle East

written by GEG | August 10, 2018

Israel military is attacking Palestinian civilians in retaliation against Hamas for launching rockets into Israeli territory. On Thursday, Saudi military killed more than 50 Palestinians, mostly children, in an air strike on a school bus.

FDA Buying Aborted Baby Tissue to Create Humanized Mice. Really!

written by GEG | August 10, 2018

The FDA is negotiating to buy aborted baby tissue to create 'humanized mice' with a human immune system to be used for drug testing. Genetically engineered (so-called humanized) mice already have been created using other sources, including umbilical-cord blood cells and peripheral-blood stem cells.
