

5G Transmitters Have Been Turned 'ON' in Two US Cities

Verizon announced that its 5G cell towers will be turned 'on' for the first time in the US in parts of two cities, Minneapolis and Chicago. Activist, Gary Gileno, points out that millimeter waves were used as weapons by the US in war zones in the Middle East. Trump is pushing 5G with the justification that the US is in competition with China to be the first country to use 5G systems to monitor and control all human activity. Sprint will test its 5G system in Atlanta, Chicago, Dallas, Kansas City, and Los Angeles within the next two months.
