Saudi Arabia recently executed 37 people, mostly Shiites, for crimes that included participation in a political protest. At least two victims were under 18 at the time of their "crimes." Ron Paul says that President Trump has spoken of "shared values" with the Saudis, but his real goal is to keep the Saudis as business partners. Trump has argued that we can't offend the Saudis because we make \$450 billion in weapon sales to them – and the US needs their oil. The Saudi war in Yemen has led to the death of 200,000 people, and 60% of the civilians who were killed were under 5 years of age.

A group of [French](#) cattle farmers is suing the state over the mysterious death of hundreds of cows, which they believe are the victims of harmful electromagnetic fields.

Local vets are at a loss to explain the deaths.

Stéphane Le Béhec, 51, a Breton farmer in Allneuc, has lost 200 cows who died of unknown causes in the past three years and is

closing his  
business.

He has identified several potentially harmful sources, including a transformer, mobile transmission towers and wind farms whose electric currents he says blight his land. "I noted that the voltmeter reacted strongly when I stuck it in the ground or in water," he told Le Parisien.`

He has filed a legal complaint against "persons unknown" with the local prosecutor.

Patrick Le Néchet, another farmer in nearby Prénessaye, has lost 120 cows in similarly mysterious circumstances in the past five years.

"This week, he found a dead calf by its mother. Sometimes we find three in one go. We never know what we'll find," he said.

"We also have had blind calves with holes in their heads and deformed limbs that end up going round in circles and banging their heads on the walls," he added. Others can no longer walk or refuse to be milked and produce very little, as well as bullocks that are stunted.

## Venezuela: Attempted Coup to Oust President Maduro by Juan Guaidó, Backed by the US

Venezuela: Juan Guaidó who, with the backing of the US government, proclaimed himself president of his country, but without the support of Venezuelan citizens, called on the military to rise up against President Nicolás Maduro. Violence broke out as National Guard vehicles drove into a crowd of pro-Guaidó protestors near La Carlota airbase. The event may serve as justification for US intervention.

If America starts a new war, it may leave Venezuela in ruins, like Iraq, Libya and Afghanistan. In addition, eight million refugees from Venezuela could seek asylum in the US. Regime change in Venezuela does not benefit Americans, in fact, sanctions placed on Venezuelan gasoline made prices rise in the US. -GEG

UPDATE: American Quarterly's Brian Winter writes: "One of Venezuela's best journalists reporting that today's action was planned for another day, and had strong military support – but they had to bring it forward because Guaido's arrest was imminent, and then the military backed out."

Pompeo claimed Maduro was ready to flee to Cuba this morning but the Russkies talked him out of it:

Guaido's backers got they exact type of footage they wanted to try and justify foreign intervention – see videos...
