

Bangladesh: High Court Issues Directive to Cut Cell-Phone Tower Radiation

written by GEG | May 7, 2019

The High Court of Bangladesh issued an 11-point directive to protect health and the environment from mobile phone-tower radiation that includes stopping the installation of towers on residence rooftops, schools, and in populated areas.

Study Links Diet Soda to Strokes, Coronary Artery Disease and Death

written by GEG | May 7, 2019

A study of more than 80,000 racially diverse women ages 50 to 79 linked drinking two or more diet drinks a day with an increased risk for certain kinds of stroke, coronary artery disease and death.

Illegal Immigrant Allegedly Paid \$130 to “Rent” a Child to Cross the Border

written by GEG | May 7, 2019

A federal grand jury indicted Velasquez in Arizona for human smuggling. Border Patrol agents are rolling out a DNA testing program, fingerprinting children and allocating more resources to the border to investigate fraud.

US Deploys Aircraft Carrier and Bombers to Middle East in “Message” to Iran

written by GEG | May 7, 2019

John Bolton says the US is fully prepared to respond to any attack with “unrelenting force.” Critics are concerned over the possibility of a staged false-flag event against a US war ship that would be used to justify US aggression.

Could 5G Radiation Cause Weather-Forecasting Satellites to Fail?

written by GEG | May 7, 2019

Meteorologists say that 5G is likely to disrupt the satellite instruments forecasters use to monitor changes in the atmosphere, and this would impair warnings about storms.
