

Germany: Member of Parliament who Opposes Immigration Receives Death Threat from Antifa

Antifa members threatened to assassinate Christina Baum, a dentist and a member of parliament who belongs to the populist Alternative for Germany (AfD) party that campaigns against mass immigration. A cross and a vulgar letter were placed outside of her office proclaiming that she will die on December 31st. Her campaign office was attacked last month. Recently, there have been 52 attacks on party headquarters and offices in Germany, and half of those targeted the AfD. -GEG

Antifa extremists threatened to assassinate a member of parliament for the populist Alternative for Germany (AfD) party, even naming the exact date on which they would kill her.

Police confirmed that left-wing radicals posted signs outside Christina Baum's dental office in Lauda-Königshofen yesterday, including a wooden cross which read, "Nazi whore Baum, after you no cock will crow, died on December 31st, 2019."

"The cross was provided with various inscriptions, which contain on the one hand insults and on the other a threat to the member of parliament," police said in a statement.

Baum posted a photo of the cross on Facebook with the caption,

“The hatred of our political opponents is bearing fruit.”

North Carolina: Congressional Candidate Pete D'Abrosca Calls For 10-Year Moratorium on ALL Immigration

Pete D'Abrosca, a Republican from North Carolina, is running for Congress on an America First platform that includes placing a moratorium on all immigration, both legal and illegal, to achieve zero net immigration. He says that 200,000 people leave America each year and replacing them with 200,000 legal aliens would be acceptable, as the goal is simply to stop any increase in population. He says that younger Republicans are not as controlled by political elites because they understand that the Chamber of Commerce has bought and paid for politicians in Congress. D'Abrosca says immigrants are taking jobs from both working-class and middle-class Americans and that migrants are being given visas for high tech jobs, blocking educated Americans from employment in their field. He says 'Wall Street' free-market capitalism is different than 'Main Street' free-market capitalism. America

formerly had an immigration moratorium for half of the 20th century. -GEG
