

New York City Death Toll Surpasses 10,000, But 3,778 Were Never Tested

New York City's Health Department reported that the city's death toll is 10,367. That figures combines the 6,589 victims who tested positive for the virus plus another 3,778 who were never tested, but whose death certificates list the cause of death as "COVID-19 or an equivalent". Probable coronavirus deaths were more common than confirmed coronavirus deaths among victims ages 75 and older. President Trump said that authorities in New York are categorizing deaths from heart attacks as heart attacks caused by COVID-19, and then said this was OK because it was "just in case". -GEG

President Trump on Wednesday questioned Mayor Bill de Blasio's revised coronavirus death toll – a day after New York City revised how it tracks fatalities by adding more than 3,700 victims who died of apparent coronavirus symptoms and were never tested.

"I see this morning where New York added 3,000 [sic] deaths because they died. Rather than [a] heart attack, they say heart attack caused by this," he said during the daily briefing of the Coronavirus Task Force, referring to COVID-19.

Responding to a question about the staggering US death toll, which topped 27,000 Wednesday, the president suggested that the Big Apple added the new deaths to the tally "just in case" the victims had the virus.

“If you look at it, that is it. Everything we have is documented and reported great. What they are doing is just in case – that is OK. We have more cases because we do more reporting.”

COVID-19 Reportedly Killed 31,000 Americans, But Drop in Flu Deaths Is Ignored

The CDC has reported that flu cases and deaths across the US have dropped sharply as COVID-19 cases have increased. Critics contend that patients with seasonal flu and pneumonia are being categorized as coronavirus cases.

Dr. Richard Ruhling, a NeedToKnow.News reader, contributed the following comment in response to our post last week that the 2017-2018 flu killed 80,000 but there was no hysteria or panic. He wrote, “The same might be said for the 106,000 killed by Adverse Drug Reactions in hospitals reported in

Journal of AMA, 4-15-1998, and 199,000 killed by Adverse Drug Reactions as outpatients seen in the Western Journal of Med, 6/2000.” He said there was a 2.7-fold increase in those deaths in the Archives of Internal Medicine reported for 1998-2005 in the Sept 10, 2007 issue. This increase in adverse drug reactions made medical care the leading cause of death, more than heart disease or cancer, but not even mentioned in the CDC list of top 10. -GEG

As COVID-19 cases increase in the United States, flu activity continues to decrease sharply, according to the Centers for Disease Control and Prevention.

While the U.S. flu season is ebbing, it’s still not over.

“Influenza-like illness activity, while lower than last week, is still elevated,” the CDC said Friday.

The overall severity of this season’s flu remains moderate to low.

The CDC estimates that so far there have been at least 24,000 deaths from flu, 39 million flu illnesses and 400,000 hospitalizations.

CDC Flu

📌 @CDCFlu

Health Care Providers: #COVID19 activity is increasing in the United States. While #flu activity is decreasing, some flu viruses continue to circulate in the US.

Danger: DNA Vaccines Incorporate Synthetic Genes into the Recipient's Own DNA

Investigative journalist Jon Rappoport explains that Dr. Anthony Fauci has mentioned 'immunity certificates' that will be used to condition the public into accepting a mandatory vaccine. Fauci said the COVID-19 vaccine may be a DNA vaccine, which means it is gene therapy. Synthesized genes are injected into the body. They are expected to set up immunity. However, they PERMANENTLY alter the genetic makeup of the recipient. This amounts to genetic experimentation on humans in the quest to invent "new humans." -GEG

I have already written about the currency reset and other features of a technocratic future waiting in the wings. –New levels of visible surveillance, social credit scores, universal guaranteed income, Internet of Things, energy-use quotas, smart cities.

–Events can move in several directions, going forward. In this article, I explore one of those directions.

The occasion is this fake pandemic; the big hammer is the vaccine against the phony COVID.

As Fauci mentioned a couple of months ago, it could be a DNA vaccine—new technology—which means it is really gene therapy. Synthesized genes are injected into the body. They purportedly set up immunity. Actually, they PERMANENTLY alter the genetic makeup of the recipient.

As you can imagine, this creates the opportunity to put many different genes into humans. To try to invent "new humans."

The so-called immunity certificates Fauci is now talking about? They would be issued to people who test positive on the new antibody tests for COVID-19—which is an interesting turnaround, because, since 1984, positive tests results have generally been taken to mean "infected." Why the shift?

Because there is a need for these immunity certificates—as an INTRO to condition the population to an IDEA.

If and when the COVID vaccine arrives, the certificates would

be used to signify immunity for all those who take the shot.

It would function as a license. Your passport into the Brave New World. You're "immune," so you're allowed to move out of fear mode. And circulate and travel and enter schools...

For DNA vaccines, the reference is the New York Times, 3/15/15, "*Protection Without a Vaccine.*" It describes the frontier of research. Here are key quotes that illustrate the use of synthetic genes to "protect against disease," while changing the genetic makeup of humans. This is not science fiction:

"By delivering synthetic genes into the muscles of the [experimental] monkeys, the scientists are essentially re-engineering the animals to resist disease."

"'The sky's the limit,' said Michael Farzan, an immunologist at Scripps and lead author of the new study."

"The first human trial based on this strategy – called immunoprophylaxis by gene transfer, or I.G.T. – is underway, and several new ones are planned." [That was five years ago.]

"I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into viruses and injected into human tissue, usually muscle."

Here is the punchline: "The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient's own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies."

Read that again: "the synthetic gene is incorporated into the recipient's own DNA."

Alteration of the human genetic makeup.

Not just a "visit." Permanent residence.

The Times article taps Dr. David Baltimore for an opinion:

"Still, Dr. Baltimore says that he envisions that some people might be leery of a vaccination strategy that means altering their own DNA, even if it prevents a potentially fatal disease."

Yes, some people might be leery. If they have two or three working brain cells.

This is genetic roulette with a loaded gun.

And the further implications are clear. Vaccines can be used as a cover for the injections of any and all genes, whose actual purpose is unannounced.

Four Michigan Sheriffs Defy Governor Whitmer for 'Overstepping Her Executive Authority'

Thousands of citizens in their cars blocked the road to the capitol in Lansing, Michigan in response to Governor Gretchen Whitmer's executive orders for stay-at-home lockdown that has caused mass unemployment. She also banned the sale of what she called "non-essential" items. Sheriffs Mike Borkovich, Ted Schendel, Ken Falk, and Kim Cole released a press statement detailing what they said was their decision to place their oath to the Constitution above Whitmer's edicts that they said overstepped her executive authority. The sheriffs wrote, "Our focus needs to be on reopening our counties and getting people back to work." -GEG

A group of sheriffs announced they will not enforce some of Democratic Michigan Gov. Gretchen Whitmer's executive orders on the same day thousands rallied against state-mandated shelter-in-place orders outside the state Capitol in Lansing.

Sheriffs Mike Borkovich, Ted Schendel, Ken Falk, and Kim Cole of Michigan's 101st District released a press statement Wednesday afternoon detailing what they said was their decision to place their oath to the Constitution above Whitmer's wishes.

"We write today to inform the public for our respective counties of our opposition to some of Governor Whitmer's executive orders. While we understand her desire to protect the public, we question some restrictions that she has imposed as overstepping her executive authority," read the letter signed by each sheriff.

Hundreds of thousands signed petitions and joined online groups to voice their frustration with Whitmer's orders and to organize protests. Whitmer enacted the stay-at-home policy on

March 22 and has been met with criticism from small-business owners and the unemployed.

PRESS RELEASE

April 15, 2020

For Immediate Release

Sheriffs of the 101st House District Speak Out

As Sheriffs of Michigan's 101st House district, comprised of Leelanau, Benzie, Manistee, and Mason Counties, we write today to inform the public of our respective counties of our opposition to some of Governor Whitmer's executive orders. While we understand her desire to protect the public, we question some restrictions that she has imposed as overstepping her executive authority. She has created a vague framework of emergency laws that only confuse Michigan citizens.

As a result, we will not have strict enforcement of these orders. We will deal with every case as an individual situation and apply common sense in assessing the apparent violation.

Each of us took an oath to uphold and defend the Michigan Constitution, as well as the US Constitution, and to ensure that your God given rights are not violated. We believe that we are the last line of defense in protecting your civil liberties.

Our focus needs to be on reopening our counties and getting people back to work. We also need to be aware that this virus is deadly and that we need to continue to practice social distancing, washing of hands, wearing of masks as well as other medically recommended measures. Allowing those without paychecks back to work is imperative to the economic success and wellbeing of our community. We can do this in stages, especially those that work outside.

Together, as a community, we will overcome this pandemic, and as Americans, we will persevere and come out even stronger than before. As Sheriffs of your community we want you to know we have your back and will continue to serve the people who have entrusted us with your protection.

Leelanau County Sheriff Mike Borkovich
Benzie County Sheriff Ted Schendel
Manistee County Sheriff Ken Falk
Mason County Sheriff Kim Cole
