

Are Clinical Trials of Hydroxychloroquine Designed to Kill People to Prove it Should Not be Used?

written by GEG | June 25, 2020

Several clinical trials of hydroxychloroquine (HCQ) have been administering huge, lethal-sized doses of the drug to COVID patients. If the inexpensive HCQ is said to fail because of these deaths, it will be tossed aside and the coast will be clear for vaccines, which will generate far greater profits for the pharmaceutical industry.

Dr. Meryl Nass uncovered a UN World Health Organization experiment, Solidarity, that gave four times the normal level of HCQ to thousands of Covid-19 patients. Dr. Nass also discovered a similar experiment, Recovery, that was sponsored by GlaxoSmithKline, the Bill and Melinda Gates Foundation, and the UK government. Out of 1,542 patients, 396 patients (25.7%) who were in the high-dose HCQ group died. Dr. Nass discovered a third experiment, Remap, that delivered multiple high doses of HCQ to patients who are on ventilators or were in shock and even combined HCQ with other drugs that are known to cause harmful reactions when used in combination. -GEG

Mr Barr: You must look into this one. Yesterday. Set your hounds loose.

Summary: Several clinical trials of hydroxychloroquine (HCQ) have been administering huge doses of the drug to COVID patients—doses that can easily be lethal.

Obviously, if the inexpensive HCQ is said to fail, and is called dangerous, then it is sidelined, in favor of far more expensive (and profitable) drugs. And the promised vaccine has a clear field as the only “reasonable strategy against the pandemic.”

Meaning: sky-high profits for the manufacturers. Get it?

The 6/20/2020 article exposing the crimes is posted at the Alliance for Human Research Protection (ahrp.org): *“COVID-19 Has Turned Public Health Into a Lethal, Patient-Killing Experimental Endeavor,”* by Vera Sharav. Two detailed sections of the article are written

by Meryl Nass, MD, who did the investigation to uncover the sordid and astonishing details:

“Dr. Meryl Nass has uncovered a hornet’s nest of government sponsored Hydroxychloroquine experiments that were designed to kill severely ill, Covid-19 hospitalized patients. On June 14th Dr. Nass first identified two Covid-19 experiments in which massive, high toxic doses – four times higher than safe of hydroxychloroquine were being given to severely ill hospitalized patients in intensive care units.”

* “Solidarity [experiment] was being conducted by the World Health Organization, on 3500 Covid-19 patients at 400 hospitals, across 35 countries. The trial was suspended following the fraudulent Surgisphere report in The Lancet that claimed 35% higher death rates in patients receiving Hydroxychloroquine [for the background on that fraudulent report, [click here](#)]. But when The Lancet retracted the report, the WHO *resumed* the Solidarity trial. More than 100 countries expressed interest in participating in the trial.”

* “Recovery experiment used very similar doses. It was sponsored by the Wellcome Trust (GlaxoSmithKline) and the Bill and Melinda Gates Foundation and the UK government. The experiment was conducted at Oxford University, on 1,542 patients of these 396 patients (25.7%) who were in the high dose Hydroxychloroquine arm, died.”

“Update: After Dr. Nass’ discovery was publicly disseminated, the WHO suspended the trial on Wednesday June 17th.”

“On Friday, June 19th, Dr. Nass uncovered a third, “Even Worse” hydroxychloroquine experiment. REMAP targets patients who are on a ventilator, or in shock – i.e., near death. Such patients are hardly capable of giving consent. Rather than attempting to save their lives, they are being used given multiple high doses of hydroxychloroquine and other drugs whose combination is contraindicated.”

“Of note: All the online protocols have been stamped ‘Not for IRB (Institutional Review Board) submission’.” [emphasis in original]

“This is an ongoing medical atrocity being perpetrated by medical doctors at 200 sites in 14 countries: include: Australia, Belgium, Canada, Croatia, Germany, Hungary, Ireland, Netherlands, New Zealand, Portugal, Romania, Spain, United Kingdom, and the United States of America.”
