

COVID-19 Cases Increasing with Increased Testing, Yet Deaths Plunge

written by GEG | July 2, 2020

The tests for the coronavirus are incapable of distinguishing between COVID-19 and many other viruses, including seasonal flu. For all we know, the so-called “cases” of COVID-19 could be responses to other things. The entire charade of “case” statistics is theater, not science.

Black Florida Sheriff Vows to Deputize Gun Owners If Violent Protests Erupt

written by GEG | July 2, 2020

Sheriff Daniels warned that if there aren't enough officers to handle an influx of protesters, he will make the gun owners of Clay County "special deputies" in order to quell domestic terrorist and insurrectionist activity. [Be sure to play the short video of the Sherrif's statement. It will make you proud of the police for a change.]

Infant Deaths Decrease 30% During Lockdown, Coinciding with Sharp Drop in Vaccinations

written by GEG | July 2, 2020

Researchers showed that that the weekly number of deaths among infants during the pandemic lockdown dropped by about 30%. "Starting in early March, expected deaths began a sharp decline, from an expected level of around 700 deaths per week to well under 500 by mid-April and throughout May."
