

Washington, DC: 21 People Shot at House Party, 1 Dead

There was a mass shooting over the weekend in Washington, DC at a house party where hundreds attended; 21 people were injured and a 17-year old male is dead. Incredible as it may sound, the politicians and the media are blaming the tragedy on the fact that the size of the party exceeded the limit during Covid lock down! Everyone in authority is playing this story with that spin. [Apparently, we are supposed to think that, if the group had been limited to 50 people, there would have been no shooting. Just as deaths from all medical conditions are labeled as Covid caused, now we must endure further insult to our intelligence by being told that fights and shootings at parties are caused by citizens ignoring guidelines for masking and social distancing.] -GEG
