

Project Veritas Exposes Vote-Rigging Scheme Tied to Somali Congresswoman Ilhan Omar

Conservative watch-dog group Project Veritas investigated ballot harvesting within the Somali community in Minnesota and was advised that a large extended family clan, including Congresswoman Ilhan Omar's family, are elected into office through voter fraud.

Liban Mohamed, the brother of a Minneapolis City Council, incriminated himself by saying he had 300 absentee ballots for his brother in his car. Minnesota law allows only three ballots to be harvested, not 300. Whistleblower Jamal said that Liban Mohamed is one of hundreds of ballot harvesters who work for Congresswoman Ilhan Omar to obtain blank ballots, especially from the elderly. An unidentified female former political worker said that Ali Isse Gainey, a staff member for Ilhan Omar, provided cash for votes and that Ilhan's office tracks Somali ballots with voters' social security numbers. She said that many of the people who apply for the absentee ballots are from out of state and truck drivers get temporary addresses to vote.

Robert Kiyosaki: Last Call for Reality – Dreamers Will Not Do Well

Robert Kiyosaki, Author of *Rich Dad, Poor Dad* and contrarian investor with a bent for real estate and gold, previews his upcoming presentation at Red Pill Expo on Jekyll Island, Georgia, October 10-11. His message is what one might call 'tough love for humanity'. The next twelve months may be your last chance to take the red pill for understanding what is really happening to the economy, why it is happening, and what you absolutely must do if you hope to survive the biggest crash-and-reset in the history of mankind.

The Titanic Never Sank – The Greatest Marine-Insurance Fraud in History

Patrea Patrick, filmmaker and author of *Ten Days at Jekyll Island* and *Titanic, A Perfect Crime*, previews her upcoming presentation at Red Pill Expo on Jekyll Island, Georgia, October 10-11. Everyone knows Titanic Sank. Right? Well, maybe not. A ship sank that looked like the Titanic and had the Titanic name on its bow, but shipyard records verify from the ID number on the propeller of the sunken vessel that it really was the Olympic, the Titanic's sister ship. The Olympic had been involved in two collisions that damaged her keel so badly she was no longer seaworthy, could not be fixed, and was uninsurable. This meant she would have to be scrapped at a terrible financial loss to its owner, J.P. Morgan. The solution was simple: switch names on the hull, tell everyone they were sailing on the Titanic, and put in motion a string of events that would cause her to sink, supposedly by striking an iceberg. Thus, the insurance on the Titanic would cover the loss of the Olympic, and no one would be the wiser except a few insiders who were well rewarded for their silence.
