

# Chinese Ambassador Accuses US and EU Leaders of 'Genocide Policy' Against Whites

written by GEG | October 23, 2020

China's Ambassador to Grenada, Dr. Zhao Yongchen, responded to claims by a US national security adviser that China country is "committing genocide" against the exploding Muslim Uyghur population by suggesting that US and European leaders could be pursuing a "genocide policy" against their own populations. He wrote, "In Europe and America, the birth rate of whites has fallen very seriously. Is this the result of the genocide policy pursued by their leaders?" Whites are projected to be a minority anywhere from 2030 to 2050. -GEG
