

# Nurse Says Covid-19 Vaccine Paralyzed her Face

written by GEG | December 30, 2020

Khalilah Mitchell says she is a registered nurse and got Bell's palsy, which causes one side of the face to droop, three days after she took the Covid-19 vaccine, and blamed the vaccine. She began crying and said that those who are pushing the vaccine do not care about us, and begged Americans to reject the vaccine.
