

Italy: A Doctor and 3 Other Health Professionals Die After RNA COVID Vaccinations

The Italian media has reported on several deaths among hospital healthcare workers shortly after receiving RNA Covid vaccines. Mauro Valeriano D'Auria, a 45-year old gastroenterologist at Umberto Hospital, reportedly died from a heart attack while playing tennis on January 24, 2021. He had posted on his FaceBook page that he had taken the "vaccine" for Covid-19 and that it was perfectly safe. Luigi Buttazzo, a 42-year old surgical equipment technician, was found dead in his bed, which may have been caused by a heart attack, according to a report. He had recently received the second dose of Pfizer's RNA vaccine. Nurse Elisabeth Durazzo, 39, reportedly died in her sleep from cardiac arrest ten days after taking the vaccine. Pharmacist Miriam Gabriela Godoy, 49, died less than a week after taking the vaccine. Authorities have said her death was unrelated to the vaccine. No autopsy was performed. -GEG

The Italian media has reported on several deaths among young hospital healthcare workers, just shortly after receiving the experimental Pfizer mRNA COVID injections.

Mauro Valeriano D'Auria, a gastroenterologist at Umberto I Hospital in Nocera Inferiore, reportedly dropped dead from a heart attack while playing tennis, on January 24, 2021.

He was said to be "in the prime of life, and in perfect health."

He had boasted on his FaceBook page that he had taken the “vaccine” for Covid-19 and that it was perfectly safe. (Source.)

42-year-old nurse Luigi Buttazzo, a surgical equipment technician at the Tor Vergata Hospital in Rome, was reportedly found dead in bed, according to a report published January 27, 2021.

He had reportedly just received the second dose of the Pfizer mRNA injection.

A heart attack is suspected. (Source.)
