

Peer-Review Study Finds that CDC Inflated Covid Deaths by 1,600%

written by GEG | February 12, 2021

The CDC inflated the COVID fatality number by at least 1,600%, according to a peer-reviewed study, "COVID-19 Data Collection, Comorbidity & Federal Law: A Historical Retrospective." The 25-page study exposed testing inaccuracies and unscientific procedures that resulted in enormous false-positive spikes.

Examples of the fraud include the CDC's quiet admission that people can test positive on an antibody test if they have antibodies from a family of viruses that cause the common cold. The CDC wrote new rules to count probable cases of Covid as actual cases of Covid without proof of infection. The rules failed to prevent a patient from being counted multiple times. The CDC changed Covid collection and reporting standards last March to hide preexisting health conditions/comorbidities on death reports. People who died with Covid were listed as dying from Covid.

The watchdog group All Concerned Citizens declared that the CDC acted illegally when it failed to apply for mandatory federal oversight and failed to open a mandatory period for public scientific comment. The CDC is required to be in full compliance with all federal laws even during emergencies.

100 Percent Fed Up reports – Throughout the election, Donald Trump was battered by CCP Virus statistics in order to hurt the American economy and his political campaign. We know that it was shamelessly wielded as a political weapon to prevent President Trump and his supporters from rallying as Antifa and Black Lives Matter burned progressive poor and minority neighborhoods to the ground throughout the entire year. Now that Biden has been installed into the office of president, **he promises to increase Covid lockdown measures and extend them further into your ability to travel and force unscientific mask-wearing for at least 100 days.**

But, **a new peer reviewed study** has been released that finds the CDC numbers to be so wildly unsupported as to be pure propaganda that is based on wholly unscientific practices that were needlessly created on-the-spot.

The National File Reports

“The Centers for Disease Control and Prevention (CDC) stands accused of violating federal law by inflating Coronavirus fatality numbers, according to stunning information obtained by NATIONAL FILE.

CDC illegally inflated the COVID fatality number by at least 1,600 percent as the 2020 presidential election played out, according to a study published by the Public Health Initiative of the Institute for Pure and Applied Knowledge. The study, “COVID-19 Data Collection, Comorbidity & Federal Law: A Historical Retrospective,” was authored by Henry Ealy, Michael McEvoy, Daniel Chong, John Nowicki , Monica Sava, Sandeep Gupta, David White, James Jordan , Daniel Simon, and Paul Anderson.”

The study is 25 pages long with over 100 citations. However, the main main points can be summarized.

A major point is that **testing inaccuracies and unreliability** combined with **unscientific procedures and methods** resulted in demonstrably massive false-positive spikes:

*“The CDC is now legally requiring red-blooded Americans to wear face masks on all public transportation as globalists try to push the concept of “double-masking” on the populace. Since the election, the **World Health Organization admits** that PCR tests are not totally reliable on the first try and a second test might be needed. This corresponds with CDC’s quiet **admission** that it blended viral and antibody test results for its case numbers and that people can test **positive on an antibody test if they have antibodies from a family of viruses that cause the common cold**. Hospitals in Florida had so many accuracy complications that **Orlando Health had to admit** that its 9.4 percent positivity rate got recorded at 98 percent.*
