In addition to the two impeachments of Trump, the left now threatens to bring criminal charges against the former president. The Biden regime and the FBI have hunted down and charged hundreds of Americans for merely being seen in the Capitol. FBI DIrector Chris Wray labeled pro-Trump Capitol demonstrators ‘domestic terrorists’.

The Canadian government declared the Proud Boys a “terrorist entity” alongside ISIS and Al Qaeda, allowing the government to freeze the group’s assets and “charge anyone who financially or materially supports the group.”

Emmanuel Macron’s regime in France issued a decree banning the anti-immigration group Generation Identity, claiming it has the character of a militia. In Germany, the Merkel regime declared the anti-immigration AfD party a “suspected extremist group” and has put its members under surveillance. Last year, Greece banned the popular anti-immigration Golden Dawn party and ordered the leaders to be jailed for 13 years after declaring the group a “criminal organization.” -GEG
