

CDC Calls “Emergency Meeting” After Reports of Heart Inflammation Following Vaccination. Germany Advises Against Covid Shots in Young People.

written by GEG | June 11, 2021

The CDC has called for an “emergency meeting” following 573 reports of myocarditis inflammation of the heart in people vaccinated with the Pfizer or Moderna vaccines. The CDC recently said it would launch an investigation into a link between the vaccine and several cases of heart inflammation in vaccinated adolescents.
