

Is the 'Delta Variant' a Hoax? Or is it a Cover for COVID Vaccine-Related Deaths?

written by GEG | July 5, 2021

In Israel, about half of the people who were diagnosed with the Delta variant were fully vaccinated. A British study showed that 59% of people who were diagnosed with the Delta variant and died had at least one dose of a COVID-19 vaccine. Critics believe that the Delta variant is a cover for vaccine-related deaths.
