

Dr. Mercola 'Deleting all Content' due to Threats from Biden Regime; CNN Stalks Him in the Street

written by GEG | August 6, 2021

The Biden Administration has pressured popular health expert Dr. Joseph Mercola to delete over 15,000 articles from his natural-health website. The FDA threatened him with criminal penalties by claiming he was marketing Vitamins C and D as an effective coronavirus treatment. A foreign lobby called the "Center for Countering Digital Hate" labeled him #1 on their "disinformation dozen" list for reporting on the risks of Covid vaccines. CNN has harassed Mercola at his home, doxxed his home address, and stalked him in the street. For his safety and to try to save his business, he says he will write news articles but will only post them for 48 hours. He has withdrawn all copyright restrictions so others may download and share them. -GEG
