

France Continues Protests – Unvaxed Enjoy Picnics Outside of ‘Vax-Only’ Restaurants

written by GEG | August 27, 2021

France: Hundreds of thousands of people (or more) protested across the country against the vaccine passport/ Covid health pass last weekend, pushing back after the government passed a law requiring passports for entry into indoor venues. Reuters reported that only half of the restaurants in Paris were complying with the vax rules earlier this month. Restaurants that require proof of vaccination are nearly empty as citizens picnic outside their doors. -GEG

Excerpts from information Liberation:

The French have held massive protests against the Macron regime's new vaccine passport.

Video of various cities in France protesting against the Vax Pass yesterday – they're not all there, there were protests in 250 places – but it gives you an idea. We HAVE the numbers, we CAN defeat the globalists. Keep the faith ☐☐
