

Pfizer's Confidential Government Contract Reveals Jaw-Dropping Terms

Ehdan Biber, an information-security expert, discovered a Pfizer confidential government contract on an Albanian website that is so heavily biased that it literally converts governments into agents of Pfizer. Biber wrote that Ivermectin, an anti-parasite medicine that has been used successfully in several countries against COVID, was suppressed because the Pfizer contract requires that, even if a drug is found to treat COVID-19 effectively, the contract to continue buying products from Pfizer cannot be voided. The contract requires governments to commit to paying for the products even if they are not shipped on time, and no products may be returned. Governments must acknowledge that the effectiveness and potential adverse effects and injuries are unknown. The contract is written to supersede any local law of the state. It stipulates that the “Purchaser (meaning the government) hereby agrees to indemnify, DEFEND AND HOLD HARMLESS Pfizer, BioNTech (and) their Affiliates...from and against any and all suits, claims, actions, demands, losses, damages, liabilities, settlements, penalties, fines, costs and expenses...” The contract says that there is no limit to the immunity from prosecution bestowed upon Pfizer even if the company commits fraud. Finally, if the purchasing government fails to enforce these defenses on behalf of Pfizer, a court in New York has the authority and capacity to take the physical assets of that country and transfer them to Pfizer. One of the most stunning clauses stipulates: “If there are any laws or regulations in your country under which Pfizer could

be prosecuted, you agree to CHANGE THE LAW OR REGULATION to close that off.” -GEG

Unredacted contracts for the experimental biological agent known as the “COVID-19 vaccine” between the Pfizer corporation and various governments continue to be revealed.

Information security expert Ehden Biber told *America's Frontline Doctors* (AFLDS) *Frontline News* that the first document to recently emerge was discovered by Albanian newspaper *Gogo.al*. Biber then was able to locate the digitally-signed Brazilian contract, and at least two others, one with the European Commission, and the other with the Dominican Republic.

AFLDS Chief Science Officer Dr. Michael Yeadon responded to the revelations after perusing the Albania contract, saying it “looks genuine.” He continued: “I know the basic anatomy of these agreements and nothing is missing that I’d expect to be present, and I’ve seen no clues that suggests it’s fake.”

“First,” Biber continues, “let’s talk about the product: The agreement not only covers manufacturing of vaccines for COVID-19 and its mutations, but also for ‘any device, technology, or product used in the administration of or to enhance the use or effect of, such vaccine.’”

1.54 “Vaccine” shall include (a) all vaccines manufactured, in whole or in part, or supplied, directly or indirectly, by or on behalf of Pfizer or BioNTech or any of their Affiliates pursuant to this Agreement that are intended for the prevention of the human disease COVID-19 or any other human disease, in each case which is caused by any of the virus SARS-CoV-2, and/or any or all related strains, mutations, modifications or derivatives of the foregoing, (b) any device, technology, or product used in the administration of or to enhance the use or effect of, such vaccine, or (c) any component or constituent material of (a) or (b).

“If you were wondering why Ivermectin was suppressed, it is because the agreement that countries had with Pfizer does not allow them to escape their contract, which states that even if a drug will be found to treat COVID-19, the contract cannot be voided”

Purchaser acknowledges and agrees that (i) Pfizer’s efforts to develop and manufacture the Product are aspirational in nature and subject to significant risks and uncertainties, and (ii) the fact that any other drug or vaccine to prevent, treat or cure COVID-19 infection is successfully developed or granted authorization earlier than the granting of Authorization for the Product shall not change the current situation of urgent needs for prevention of the spread of the COVID-19 infection that poses serious threats to and harmful effects on the lives and health of the general public.
