

# Financial Expert Excoriates Vaccine Passports and Explains Why Controllers Are Targeting Children

Melissa Ciummei, a financial investor from Northern Ireland, explained that vaccine passports, also called health passes, serve no purpose in promoting health, but are instead a tool for control. She warned that children are targeted for the purpose of indoctrination for the future. A digital ID is necessary to bring in central bank digital currency (CBDC) for totalitarian control, and vaccine passports are necessary to bring in digital ID. Vaccine passports will also combine social credits and carbon credits. China has already instituted CBDC. Ms. Ciummei made a case for protecting individual wealth and autonomy with precious metals that can operate outside of the totalitarian digital system. She warned that Bitcoin and other cryptocurrencies can be regulated out of existence simply by taxing it at 90%. There is no going back to the old system; blockchain is the future. The IRS now requires taxpayers to declare whether they received, sold, sent, exchanged, or acquired cryptocurrency, and failure to disclose transaction is a felony. Ciummei warned that the economy is failing and we only have a short time to prepare. She explained that we are at war and mass non-compliance by the people is needed.
