

# UK: Vaccinated Adults Under 60 Are Dying at Twice the Rate of Unvaccinated People the Same Age

written by GEG | November 21, 2021

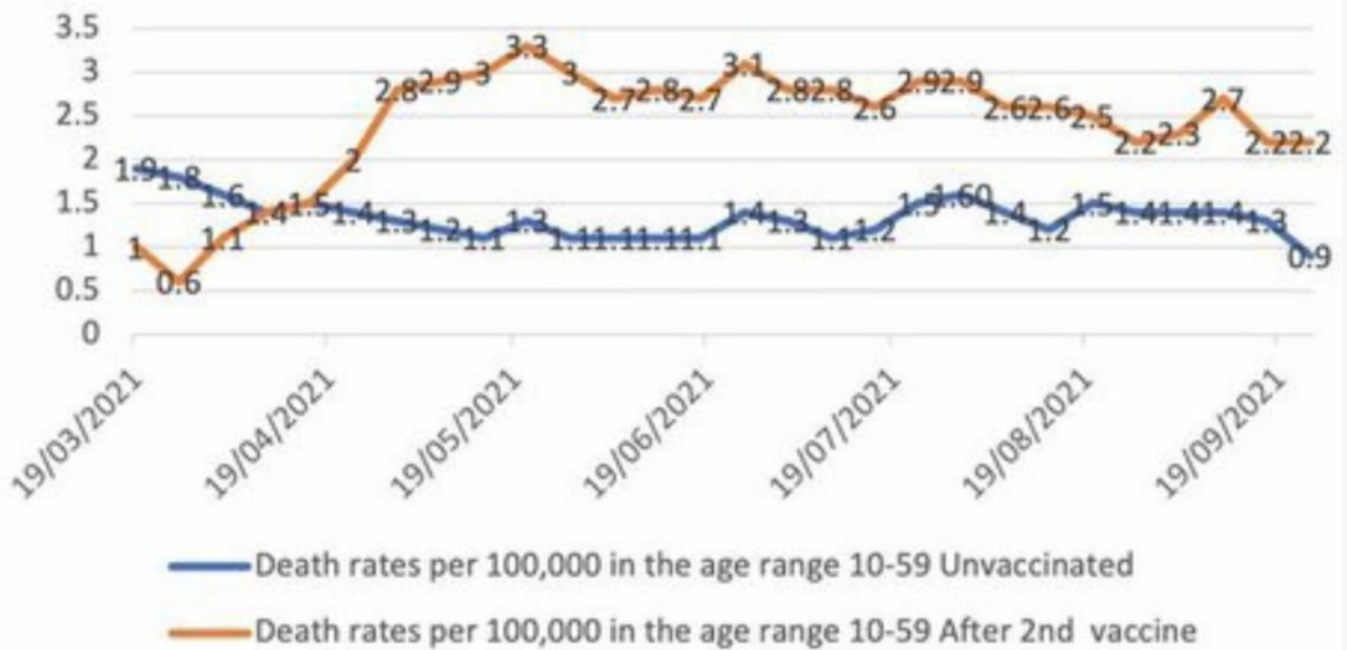

UK: Government data and its corresponding graph show that vaccinated people under 60 are dying at twice the rate of unvaccinated people in the same age group. And overall deaths in Britain are running high and above normal.

The brown line represents weekly deaths from all causes of vaccinated people aged 10-59, per 100,000 people.

The blue line represents weekly deaths from all causes of unvaccinated people per 100,000 in the same age range.

## Death Rates 10-59 by Vaccine Status ONS Data

Published November 2021

I have checked the underlying dataset myself and this graph is correct. Vaccinated people under 60 are twice as likely to die as unvaccinated people. And overall deaths in Britain are running well above normal.

I don't know how to explain this other than vaccine-caused mortality.
