

House Passes \$40 Billion Aid Package for Ukraine, 149 Republicans Vote in Support of War Package

written by GEG | May 13, 2022

The House of Representatives on Tuesday evening voted 368-57 to approve a \$40 billion foreign aid package for Ukraine. 149 Republicans voted in support of the package, including Kevin McCarthy. Only 57 Republicans voted no. Congresswoman Marjorie Taylor Greene gave a scathing speech arguing against funding Ukraine and implored Congress to “stop funding regime change and money laundering schemes.” She pointed out that there is a shortage of baby formula in America, yet the bill provides President Biden with \$17 million, funding for the CIA, \$54 million for COVID in Ukraine, \$900 million for family and friends of politicians to provide services, and the mass immigration “resettlement” of anyone who resided in Ukraine. Rand Paul has staved off the vote in the Senate until next week in an effort to insert language into the text of the bill that would ensure an inspector general would have oversight over the spending approved in the bill. Georgia Rep Marjorie Taylor Greene (R) on Tuesday went off on the uniparty for risking nuclear war with Russia by advancing a bill to provide Ukraine with an astonishing \$40 billion in military and economic aid.
