

CNN's Don Lemon Gets Schooled after Trying to Blame Hurricane Ian on Global Warming

written by GEG | September 30, 2022

The NOAA Director told Lemon, "I don't think you can link climate change to any one event. on a whole, on an accumulative, climate change may be making storms worse. But to link it to any one event, I would caution against that." Despite data manipulation, hurricanes are not more frequent today.
