

# Cardiologist Asks: Why Is COVID Jab 'Not Being Pulled' After Showing Adverse Reaction Rate of 1 in 800?

written by GEG | February 22, 2023

The Pfizer and Moderna mRNA vaccines were associated with an excess risk of serious adverse events of special interest in 12.5 per 10,000 vaccinated." 10,000 divided by 12.5 equals 1 in 800.
