

# Microscopy Photos of Blood Clots from Those who “Suddenly Died”

written by GEG | June 15, 2022

Unlike normal clots which are gelatinous, these clots contain large, complex structures that include tough and fibrous material, crystalline-like formations, a microchip-like structure, and a wire-like structure. It is unknown how many of the specimens were taken from people who received COVID vaccines.

## Thousands of Deaths and Adverse Reactions Deleted From the CDC's VAERS Database

written by GEG | June 15, 2022

If the COVID jabs worked, you'd expect excess mortality to drop, yet that's not what we're seeing. We're also not seeing mass death from COVID. The only clear factor that might account for these discrepancies is mass injection with an experimental gene transfer technology.

## CDC Panel Recommends MonkeyPox Vaccine for Health Care and Lab Workers

written by GEG | June 15, 2022

Nine cases were confirmed by the CDC using flawed PCR tests that are not intended to

diagnose disease. Monkeypox is said to be transmissible through close skin contact or through respiratory droplets. The vast majority of infections are in gay and bisexual men.

## Top Biden Health Officials Issue New COVID-19 Warning, Urge Mask-Wearing

written by GEG | June 15, 2022

Rochelle Walensky said Americans who live in counties with medium levels of Covid-19

should avoid crowds and wear a mask. She wrote, "As of May 19th, over 45% of the U.S. population is in an area with a medium or high COVID-19 Community Level."

---

## Student Athletes Now Being Screened For COVID Vaccine Adverse Reaction Risks

written by GEG | June 15, 2022

major study from Scandinavia found that in the populations of people over 12 in Denmark, Finland, Norway and Sweden suffered severe myocarditis at around five times higher when compared to individuals who took the Pfizer shot, and 14 times more common after taking the Moderna shot.
