

# YouTube Bans all Content that Questions the Safety or Effectiveness of Vaccines

Youtube, under Susan Wojcicki's leadership, has already removed 130,000 videos for violating their COVID-19 vaccine policies, and the company is now expanding its ban to criticism of other vaccines as well. Despite evidence showing that autism is linked to vaccines, Matt Halprin, the global head of trust and safety at YouTube, said, "The ban will include any media that claims vaccines are dangerous or lead to chronic health outcomes such as autism." Videos by Robert Kennedy, Jr., and Dr. Joseph Mercola have been removed.-GEG
