

Canada: Woman Paralyzed After Moderna Booster Shot Was Offered Euthanasia Twice

written by GEG | February 26, 2024

Kayla Pollock initially took two Pfizer mRNA COVID jabs in 2021 without incident, but took a third booster shot from Moderna on January 11, 2022 and became paralyzed from the neck down about 42 days later. She had a very large lesion on her spinal cord and was diagnosed with transverse myelitis.
