

Dr. Sam Bailey: Project Veritas and the “Virus”

written by GEG | February 27, 2023

The gain of function narrative has been used to gaslight people who know that there is something wrong with the official story. The purpose of promoting the virus theory is to gain power over people through masks, vaccines, surveillance and vaccine passports.

Free Movie: TERRAIN the Film

written by GEG | February 27, 2023

TERRAIN exposes the tyrannical world pandemic hoax, built upon the flawed model of illness and disease, known as 'Germ Theory'. The speakers make quite an argument for moving away, once and for all, from the idea that viruses cause disease.

Doctor Says Virus Theory of Illness is Widely Believed But Has Never Been Proven

written by GEG | February 27, 2023

Dr. Kaufman says no one has ever used scientific methods to prove that a novel virus

even exists and that, or that it caused illness. This is no small matter. If true, all the lockdowns and masks and social distancing and ventilators and loss of employment and crushing of economies is totally unnecessary.

Oxford Professor Says Vaccine Trials Failing Because Volunteers Can't Catch COVID

written by GEG | February 27, 2023

Oxford has partnered with pharmaceutical giant AstraZeneca in order to produce billions of doses. That means that, even though the vaccine is of little value, the government will purchase the billion doses and force everyone to accept them.

Why It Is Impossible to Prove That Viruses or Bacteria Cause Disease

written by GEG | February 27, 2023

Dr. Tom Cowan says that scientists have never proved that either viruses or bacteria cause disease, because they never have been isolated and purified sufficiently to eliminate the possibility that something else was the cause. Without proof, the entire germ theory of infectious disease is based on belief, not science.

New Understanding of Viruses: They May Be Defenders, Not Attackers!

written by GEG | February 27, 2023

Comparison between the current theory that viruses cause illness and death to an emerging theory of exosomes, which have the same structure as viruses but which are immune-system 'good guys'. Exosomes gather up debris from inside body and carry them out of the cells where they can be removed from the body.

The Greatest Criminal Fraud in Medical History: Where's the Virus?

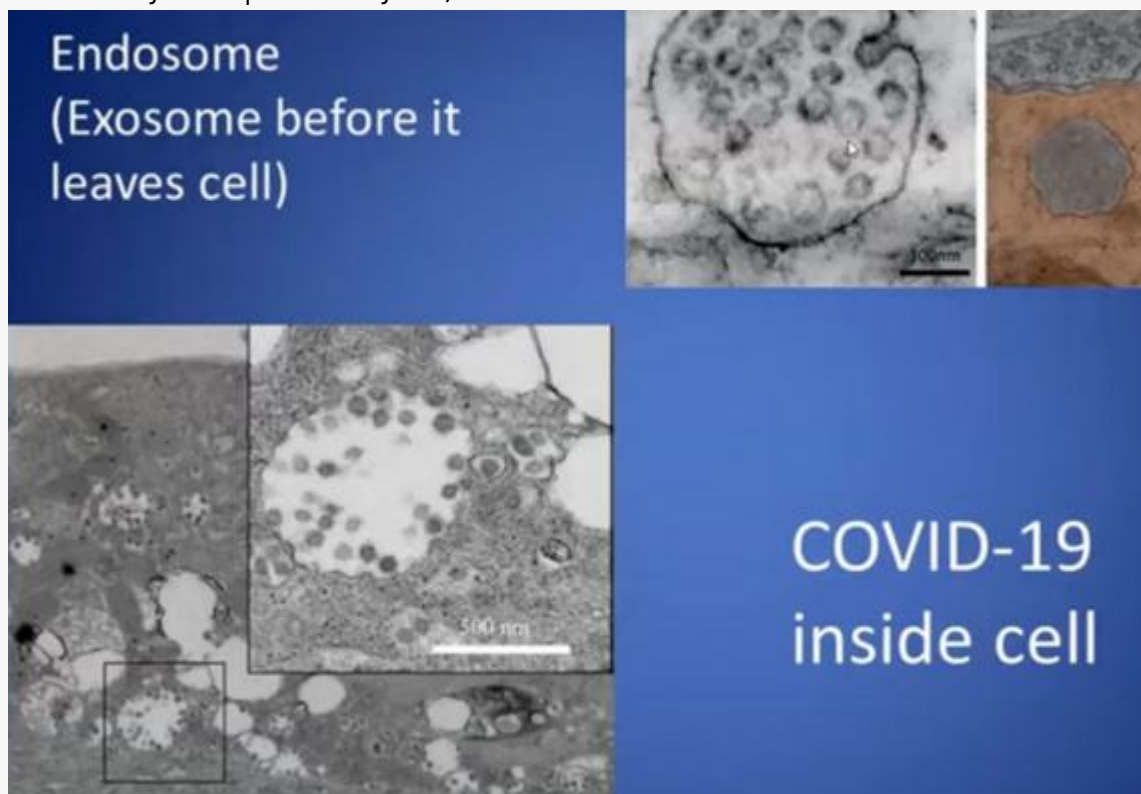

written by GEG | February 27, 2023

A study showed that the tests used to diagnose AIDS: the ELISA, Western blot, and the PCR test, are invalid as none detect the HIV virus itself or HIV particles. "...AIDS as a contagious viral disease is based on an apparently non-existent microbe!" Similarly, COVID-19 has yet to be isolated and proven.

Shocker! Doctor Shows How Viruses Fight Illness by Removing Cellular Toxins.

written by GEG | February 27, 2023

'Viruses' are exosomes. Exosomes are essential to health because they carry toxins out of sick cells and trigger the immune system to attack the cause of the illness. The global campaign to identify and kill a dreaded virus will cause even more illness

triggered by cellular trauma from toxic medications and vaccines.
