

# The American Psychological Association Says That Traditional Masculinity Is Harmful

The American Psychological Association now proclaims that masculinity is harmful. It says that masculine traits are determined by society, not biology, and should be changed. They claim that masculine boys display disruptive behavior, such as homophobia, bullying, and sexual harassment – and that this must be replaced by non competitiveness and passivity. - GEG

# Professor Says Boys Are Being Programmed And Drugged To Eliminate Masculinity

Dr. Jordan Peterson, a professor of psychology at the University of Toronto, says that boys are falling behind girls as a result of policies that seek to limit or eliminate masculinity. Natural male behavior is diagnosed as ADD which is treated with hormone-altering drugs. The elimination of competition in the classroom contributes to the problem. The left's world view that men have been oppressors of women throughout history is the predominant ideology. The culture is at war against males. -GEG

Tucker Carlson debuted a new series, "Men in America," on his Fox News program Wednesday night, saying, "American men are in crisis."

Carlson, a Daily Caller co-founder, will feature a new segment in the series every Wednesday in March, and the first featured Canadian professor Dr. Jordan Peterson.

Carlson opened by highlighting society's attempts to demonize and ostracize masculinity before pointing out the serious problems prevalent among American males.

"This is a crisis. Yet our leaders pretend it's not happening," he stated. "Ignoring the decline of men does not help anyone. Men and women need each other. One cannot exist without the other. That is elemental biology, but it's also the reality each one of us has lived, with our parents and siblings and friends. When men fail, all of us suffer."

Transcript:

*The signs are everywhere. If you're a middle aged man, you probably know a peer who has killed himself in recent years.*

*At least one. If you're a parent, you may have noticed that your daughter's friends seem a little more on the ball than your son's. They get better grades. They smoke much less marijuana. They go to more prestigious colleges. If you're an employer, you may have noticed that your female employees show up on time, the young men don't. And of course if you live in this country, you've just seen a horrifying series of mass shootings, far more than we've ever had. Women didn't do that. In every case, the shooter was a man.*

*Something ominous is happening to men in America. Everyone who pays attention knows that. What's odd is how rarely you hear it publicly acknowledged. Our leaders pledge to create more opportunities for women and girls, whom they imply are failing. Men don't need help. They're the patriarchy. They're fine. More than fine.*

*But are they fine? Here are the numbers:*

*Start with the most basic, life and death. The average American man will die five years before the average American woman. One of the reasons for this is addiction. Men are more than twice as likely as women to become alcoholics. They're also twice as likely to die of a drug OD. In New Hampshire, one of the states hit hardest by the opioid crisis, 73 percent of overdose deaths were men.*

# **New Series: 'Men Are in Crisis' Reveals Shocking Facts about the War Against Men**

Tucker Carlson reveals astonishing statistics that show men are declining physically, mentally, and socially in America and throughout Western Civilization. Men commit 77% of the suicides in America, one-in-five boys diagnosed with hyperactivity are drugged to subdue them, men trail women in receiving college degrees and going to graduate school, young adult men now are more likely to live with a parent than with a spouse or partner, 70% of American men are overweight or obese, sperm counts are down by 60% since the 1970's, and testosterone has fallen by 30%. In spite of this, it is common to categorize men as oppressors. -GEG
