

Green New Deal: California To Cut Off Water Supply Over Drought – After Dumping Trillions of Gallons of Freshwater Into Ocean!

written by GEG | June 23, 2021

A Central Valley Farmer said, “Our reservoirs were designed to provide a steady five year supply for all users, and were filled to the top in June 2019.” She said that by emptying reservoirs, California is on track to have a man-made drought crisis every time there is a dry season.
